# ARAVINTH R

**Junior SOC Analyst | Cybersecurity Analyst | SIEM & Security Monitoring**

Tamil Nadu, India | +91 9345144104 | aravinth9389@gmail.com
LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Final-year B.E. Computer Science and Engineering (Cyber Security) student seeking an entry-level SOC Analyst L1 role. Completed a cybersecurity internship with Future Interns and the 30-Days SOC Challenge by HaxCamp. Familiar with SIEM monitoring, log analysis, alert triage, IOC analysis, threat detection, and incident investigation. Hands-on project experience includes Splunk-based brute-force detection, Snort intrusion detection, phishing email analysis, and web application vulnerability assessment.

## TECHNICAL SKILLS

**SOC & SIEM:** SIEM monitoring, security monitoring, log analysis, threat detection, event correlation, alert triage, IOC analysis, incident investigation
**Security Tools:** Splunk, SPL, Sysmon, Windows Event Viewer, Wireshark, Nmap, Snort, OWASP ZAP, VirusTotal, MXToolbox
**Operating Systems:** Windows, Ubuntu, Kali Linux, basic Linux administration
**Networking:** TCP/IP, DNS, HTTP/HTTPS, SSH, ports and protocols, network traffic analysis
**Security Concepts:** MITRE ATT&CK, brute-force detection, phishing analysis, vulnerability assessment, authentication monitoring
**Programming:** Python (Basic), Java (Basic)

## CYBERSECURITY EXPERIENCE

**Cyber Security Intern | Future Interns** *April 2026*

- Completed hands-on tasks in security monitoring, log analysis, and threat identification.
- Analyzed security events, identified suspicious activity, and documented findings.
- Applied IOC analysis, vulnerability assessment, and incident response concepts in practical scenarios.

**30-Days SOC Challenge | HaxCamp** *August 2026*

- Completed a 30-day hands-on SOC program covering alert triage, log analysis, and threat detection.
- Investigated suspicious activity using security events, IOCs, network indicators, and endpoint telemetry.
- Practiced incident response workflows including investigation, containment, and documentation.

## CYBERSECURITY PROJECTS

**SSH Brute-Force Attack Detection** *Splunk, SPL, Kali Linux*

- Forwarded SSH auth.log data to Splunk Enterprise and wrote SPL queries to compare failed and successful logins by source IP and user.
- Created a detection rule for IPs with 3+ failed logins in 5 minutes, mapped to MITRE ATT&CK T1110, and documented limitations and SSH hardening steps.

**Network Intrusion Detection System** *Snort, Ubuntu Linux*

- Configured Snort to monitor network traffic and tested custom rules that generated alerts for suspicious activity.
- Documented rule logic and alert evidence in a technical report.

**Phishing Email Detection & Analysis** *VirusTotal, MXToolbox, WHOIS*

- Analyzed three phishing samples using email headers, sender authenticity, and URL reputation, then classified each by risk level.
- Documented spoofed senders, lookalike domains, and urgency tactics with prevention guidance.

**Web Application Vulnerability Assessment** *Nmap, OWASP ZAP, DevTools*

- Assessed a test web application and documented 13 findings: 3 High, 4 Medium, 4 Low, and 2 Informational.
- Reported issues including unencrypted HTTP, missing security headers, and lack of CSRF protection, with prioritized remediation steps.

## CERTIFICATIONS

- NPTEL – Ethical Hacking
- NPTEL – Computer Networks and Internet Protocols
- Cisco Networking Academy – Introduction to Cybersecurity
- Cisco Networking Academy – Networking Basics
- Coursera – Cybersecurity for Everyone

## EDUCATION

**B.E. Computer Science and Engineering (Cyber Security)** *2023–2027*
Dhanalakshmi Srinivasan Engineering College **CGPA: 8.5/10**
